

MCI project Final Milestone Plan

Team: 36

Project Title: A Node.JS web application for synchronizing student grades from external sources to MyUni

Milestone	Activities	Projected Outputs
Define the final milestone to be completed by end of week 12	List activities required to achieve milestone	Define projected outputs from your work plan
The web application can automatically get data from web submission and post students' marks into MyUni.	Transfer CSV data from web submission.	A JSON file contains 'student id' and 'mark'.
	Get data from MyUni by URL.	A JSON file contains 'id' and 'user_id'.
	Post data to MyUni based on 'user_id' and 'mark'.	Change grades in MyUni based on 'user_id'.
	Match 'user_id' and 'mark'.	Paired 'user_id' and 'mark' based on 'id' and 'student id'.
	Get data from web submission.	A JSON file contains 'student id' and 'mark' (Auto).
	Complete monitor button.	Get 'Token','Course id', and 'Assignment id'.
	Beautify the interface and complete the project.	Automate the program by entering 'Token','Course id', and 'Assignment id'.
